## Values of SQUAD WAR Ecosystem

### Community

Community is the number one value of the SQUAD WAR ecosystem. In the beginning, we asked if a project could succeed on the back of a decentralized, community effort. SQUAD WAR prevailed due to the strength of its community members and investors. Our collaborative, Like-minded community is the bedrock of the project.

### Utility

We believe utility is the foundation of value in the crypto space. SQUAD WAR was founded on the principle that the crypto space is greatly lacking in utility. We believe utility will foster adoption and growth in the crypto space, and SQUAD WAR believes to be the brand loyalty payment system that people adopt due to its community-focused nature. Our NFTs will be used in purchasing and selling, and exchanging digital assets to enjoy online activities.

### Inclusivity

SQUAD WAR values providing everyone equal access to opportunities and resources.

### Interconnectivity

Simply put all parts of a system interact with and rely on one another. SQUAD WAR believes in creating an interconnected system based on trust and reliability, that together is greater than its individual parts.

## OUR CORE VALUES

### Transparency

For far too long, cryptocurrency projects have gotten away with unscrupulous tactics and secret development teams. With crystal-defined objectives, a face for each member of our fantastic and ever-growing staff, and trackable accounts displaying what we spend through our development wallet, we aim to blow the roof down.

### Stability

We want to provide a stable developing platform that incentivizes users to keep the currency to earn incentives by using our unique and fresh tokenomics embedded into our smart contract. From the start, each of the core development team's wallet addresses will be accessible on the website, allowing anybody to view their transactions at any moment.

### Fairness

Our play-to-earn approach, coupled with our unique ecosystem, will result in the fairest and most transparent economy has ever seen in gaming. When you buy anything in the game, you know exactly what you're getting, and it has real-world worth. You can always sell your stuff later for a profit if you want to. There will be no more loot boxes or gambling. You get exactly what you see.

## SQUAD WAR NFT

**SQUAD WAR** is a vital part of our ecosystem dealing with NFT'S. **SQUAD WAR** Non-fungible tokens (NFTs) are unique, non-interchangeable assets, minted on-chain. These tokens can be linked to anything from digital **SQUAD WAR**. The core attributes of **SQUAD WAR** give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary.

### Ownership Rights

The primary benefit of non-fungible tokens is the ability to prove ownership. NFTs can assist in linking ownership to a single account because they are on a blockchain network.

### Authenticity

The advantages of non-fungible tokens are essentially determined by their rarity. NFTs are created on the blockchain, which means they are tied to one-of-a-kind data. The particular qualities of NFTs reveal their ability to add value. Simultaneously, NFT manufacturers have the option of releasing a restricted number of NFTs to create supply scarcity.

### Fraud proof

They are easily transferred and unaffected by fraud.

## NFT MARKET OVERVIEW

Last year, the popularity of non-fungible tokens skyrocketed, with multimillion-dollar sales smashing records. According to a new estimate, the NFT market will surpass \$40 billion in 2021. According to DappRadar, the trade volume of NFTs in 2021 was \$24.9 billion. This is an increase from \$95 million in 2020. In 2021, there were 2.7 million unique active wallets as a proxy for users, with 49 percent of those users connected to NFT games. Despite the average NFT price fluctuating between \$6,900 and \$1,300 in January, a record-breaking 2.4 million NFTs (worth \$4.8 billion) were traded on OpenSea. The total sales value over the previous 30 days was around 87 million dollars as of February 15, 2022.

In 2020, NFT projects in art and gaming were both valued several millions of dollars, but they were significantly smaller than in 2021.
